**PATIENT CARE TECHNICIAN \$5809
PATIENT CARE TECHNICIAN (ONLINE)-
\$6600**

The Patient Care Technician course is designed to prepare the student for an entry-level position as a patient care technician. Emphasis is on technical skills necessary to perform personal care to complex patients, implementation of selected portions of care plans, including respiratory services, rehabilitation services, EKG and phlebotomy under the supervision of registered nurses. Upon successful completion of this course, students will receive a certificate of completion and will be eligible for National Certification through the National Health career Association (NHA).

PHLEBOTOMY \$2336

PHLEBOTOMY HYBRID (ONLINE) \$2836

Course identifies the Phlebotomists role on the healthcare team. Students will be introduced to various departments within the laboratory setting and role of each department. This course provides phlebotomy instruction to the student with a working knowledge of collecting blood while emphasizing on patient safety, quality assurance, universal and standard precautions.

EKG TECHNICIAN \$2336

EKG TECHNICIAN HYBRID (ONLINE) \$2836

This course will provide you with an overview of basic cardiovascular terminology, anatomy and physiology. Focuses on the proper placement of electrocardiogram (EKG) leads and maintenance of equipment to obtain an accurate 12-Lead EKG. Learn to recognize cardiac arrhythmias. Outlines responsibilities of ECG/EKG technicians and provides clinical laboratory opportunity to develop entry level skills. Performance Based Outcomes for EKG/ECG Training Programs as approved by the National Healthcare Association. At the completion of this course, each student will be eligible to challenge the National certification exam in EKG.
